VBScript

Lua

Some time ago I created already a documentation for the **Server Script API** and **GSE build-in functions** for VBScript based call routing. With Lua based call routing peeking around the corner I decided to bring this documentation into a new format to be able to differ easily between VBScript and Lua. And of course also created all documentation for Lua based call routing as well.

So here you go!

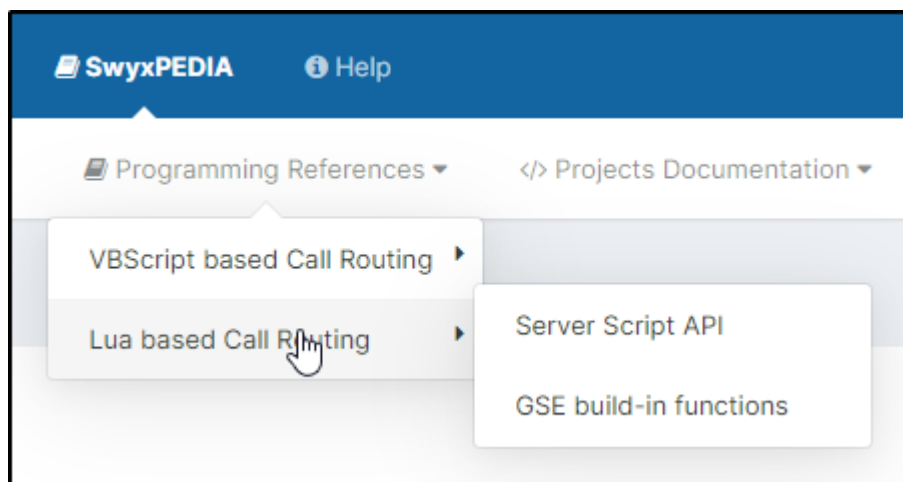

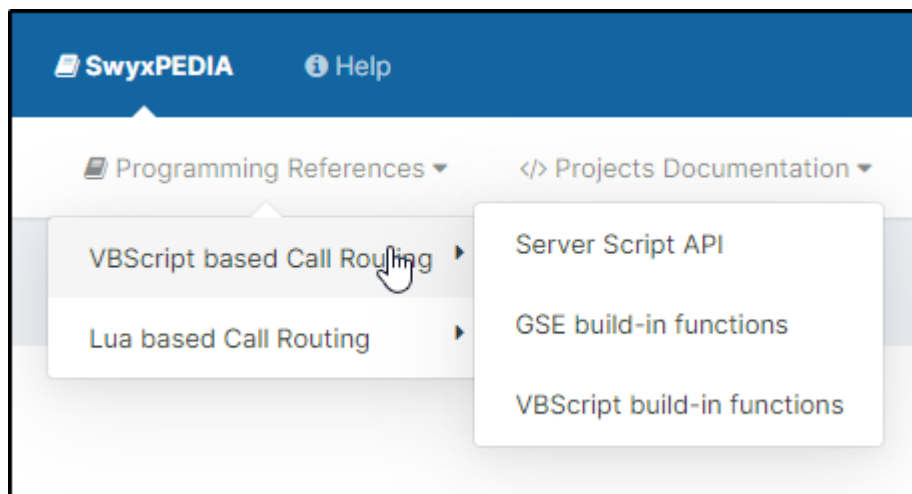

### **VBScript based call routing**

- [Server Script API](#)
- [GSE build-in functions](#)

### **Lua based call routing**

- [Server Script API](#)
- [GSE build-in functions](#)

You can also reach this documentation easily any time via the page menu:
