### Fridays' Swyx Tip #19: Send TXT message

Entry posted by Tom Wellige January 10, 2020

702 views

From 2009 to 2011 [mirjam baumberger](#) wrote a great blog, the "**Fridays' Swyx Tip**". Every Friday she posted a tip regarding the usage of SwyxWare and connected tools and devices. As the old forum is offline this article series will be restored here again over the time. Please note that some information in this article series might not be valid anymore with current SwyxWare versions.

This blog article was originally posted on 12.06.2009 02:17

Dear Swyx Users

Let's assume you are on a two day training course and therefore very hard to reach via phone or e-mail. Nevertheless SwyxWare can help you to stay in touch with your office.

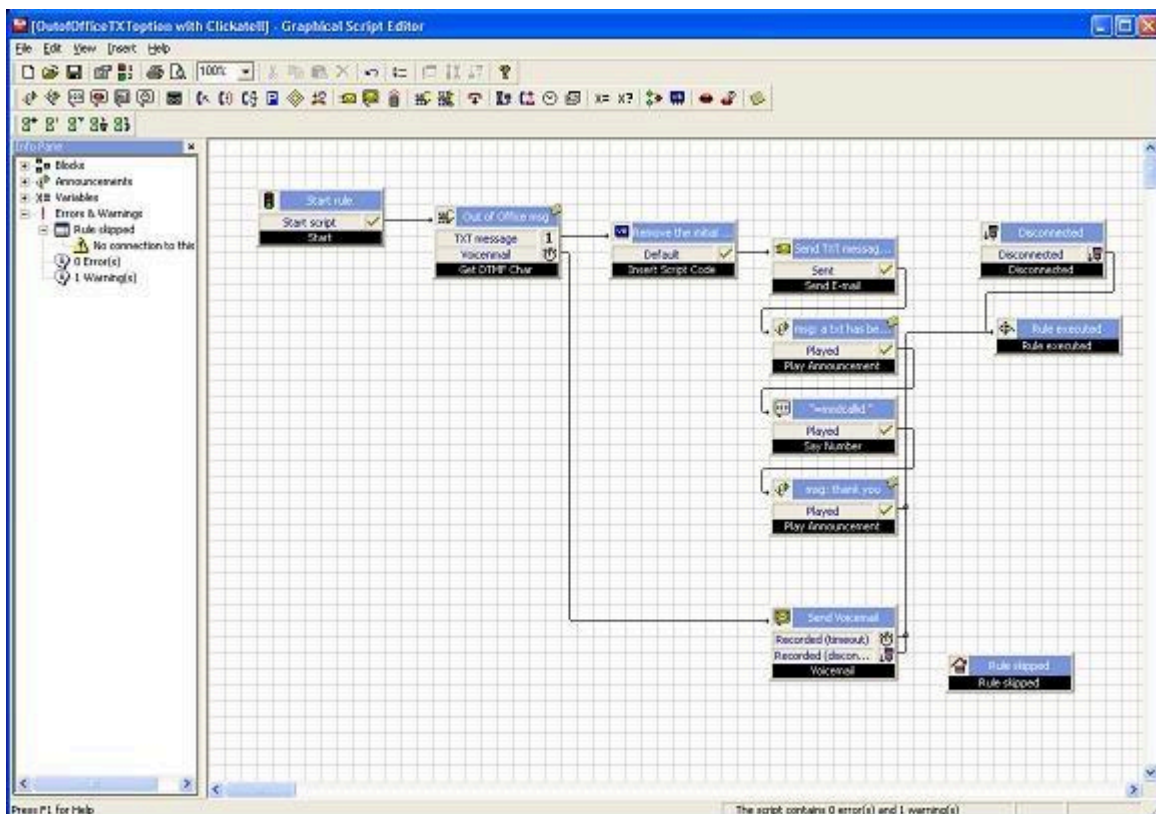

Similar to Outlook's Out-of-Office assistance, Swyx will handle any calls to your extension as you desire. For example, the caller can leave you a Voicemail, or the call can also be answered by a co-worker. But did you know that Swyx can also inform you via TXT message that caller "XY" is requesting a call back?

You are only two steps away to implement this. Download a small a sample ECR script from here

**###OutofOfficeTXTOptionwithClickatell.zip**

and configure the parameters accordingly. Secondly sign up for free with the TXT provider [clickatell](#) (as shown in the sample ECR script).

Any questions?

Have a good weekend and happy Swyxing...

Regards  
Mirjam
