## Fridays' Swyx Tip #21: Company logo on SwyxIt!

Entry posted by Tom Wellige January 24, 2020  
705 views

From 2009 to 2011 [mirjam baumberger](#) wrote a great blog, the "**Fridays' Swyx Tip**". Every Friday she posted a tip regarding the usage of SwyxWare and connected tools and devices. As the old forum is **offline**, this article series will be restored here again over the time. Please note that some information in this article series might not be valid anymore with current SwyxWare versions.

This blog article was originally posted on 26.06.2009 07:57

Dear Swyx Users

Did you know that with a couple of mouse clicks one can add a companies logo to the SwyxIt! soft phone?

One characteristic of SwyxIt! is the fact that you can design the user interface to completely meet your requirements.

This type of freely-configurable "interface" is called a Skin. Below you find a 6 step guide on how to add your company logo on to SwyxIt!

This is how you change the Swyx logo on your phone to your corporate logo:

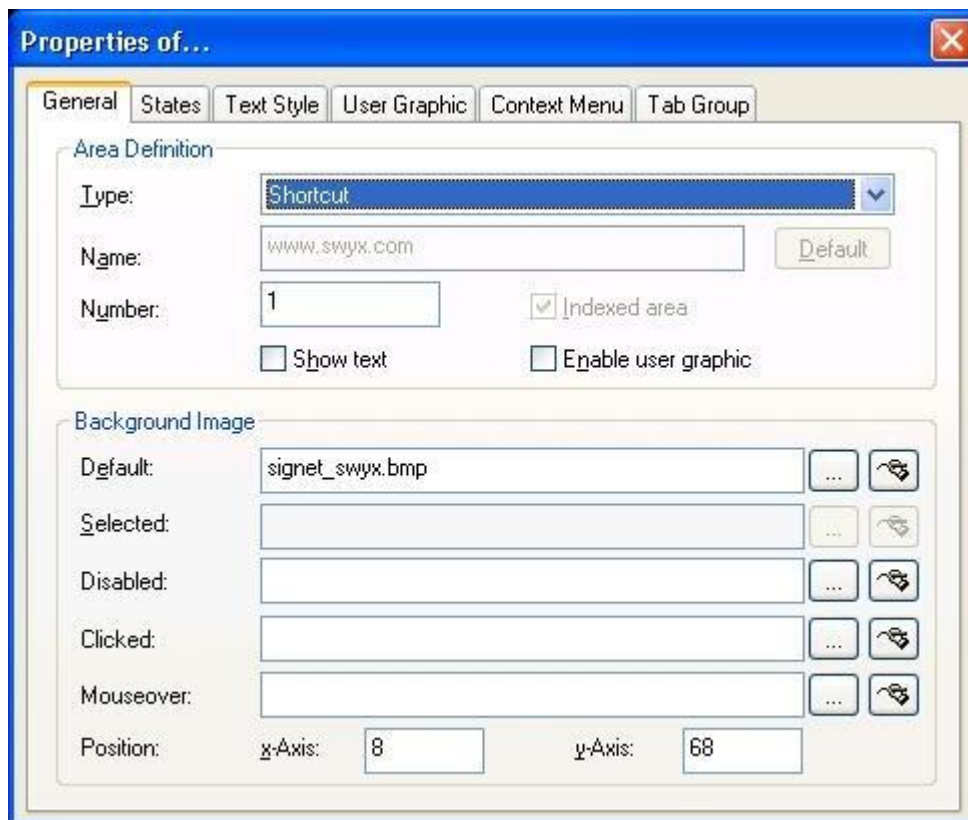

1. Select menu File/Skin/Edit.
2. The window "Hint" appears. Here you can find further help topics.

3. Click on the Swyx logo

4. The window Properties shows...

5. Now select your new logo from option "Default".

Valid formats are \*.bmp, \*.jpg, \*.gif, \*.tif, \*.png

6. Afterwards, click on File/Skin/Save

This is just a start. There is also a manual available on **"How to edit skins"**

With that you can get quick entry in the customization world.

See or download other skin created by Swyx users from **here**.

Note: You must have the appropriate rights granted by the system administrator to load, edit, and create Skins.

The following rights are possible: "Editing of Skins allowed"

Any questions?

Have a good weekend and happy Swyxing...

Regards

Mirjam
