Fridays' Swyx Tip #32: Conference Phone - MeetingPoint

Entry posted by Tom Wellige April 24, 2020
461 views

From 2009 to 2011 [mirjam baumberger](#) wrote a great blog, the "**Fridays' Swyx Tip**". Every Friday she posted a tip regarding the usage of SwyxWare and connected tools and devices. As the old forum is [offline](#), this article series will be restored here again over the time. Please note that some information in this article series might not be valid anymore with current SwyxWare versions.

This blog article was originally posted on 15.10.2009 22:03

Dear Swyx Users

I'm sure many of you are familiar with SwyxWare's Conference room facility. Meetings are an essential part of business. Planning and production meetings, sales meetings, client meetings, briefings of all kinds... they are all needed to get work done.

With more and more people working on the road or in geographically separate locations, this is an ideal way to keep everyone in today's 'virtual enterprise' working together.

If such conference calls are held in a meeting room, where multiple parties are connected together, a high quality conference phone will make a big difference.

Here I'm providing you with a "configuration guide" on how to setup a snom MeetingPoint Conference unit to your Swyx Server.

http://www.itnetworld.co.nz/products/snom/Swyx_MeetingPointConfig.pdf < click for download

The snom MeetingPoint is perfectly qualified for use in middle to large conference rooms. One can hold telephone conferences in large groups of up to 10 persons without affecting the intelligibility of the call.

Side note: The snom MeetingPoint is the only SIP conference phone that allows you to use Microsoft Office Communication Server 2007 R2 and Standard SIP accounts in one conference phone in parallel!

Have a good weekend and happy Swyxing...

Regards
Mirjam
