Fridays' Swyx Tip #38: Call voicemail directly

Entry posted by Tom Wellige July 3, 2020

6,301 views

From 2009 to 2011 [mirjam baumberger](#) wrote a great blog, the "**Fridays' Swyx Tip**". Every Friday she posted a tip regarding the usage of SwyxWare and connected tools and devices. As the old forum is **offline**, this article series will be restored here again over the time. Please note that some information in this article series might not be valid anymore with current SwyxWare versions.

This blog article was originally posted on 19.02.2010 00:41

Dear Swyx Users

Did you know that with Swyx you can call your colleague's voicemail box directly?

With SwyxIt!, this option is now right on your fingertip. Simply right-click on your co-worker's speed dial and select "Call Voicemail". You will be connected straight to the voicemail box, no matter what call routing rules are activated.

If you are using an older version of SwyxWare, no worries, you can also connect directly to someone's voicemail via feature code **extension*71***.

As an example, if I want to call Felix's voicemail box from my desk phone, I just dial **302*71***

Have a good weekend and happy Swyxing...

Regards
Mirjam
