Fridays' Swyx Tip #45: Event Log Monitor

Entry posted by Tom Wellige August 21, 2020

953 views

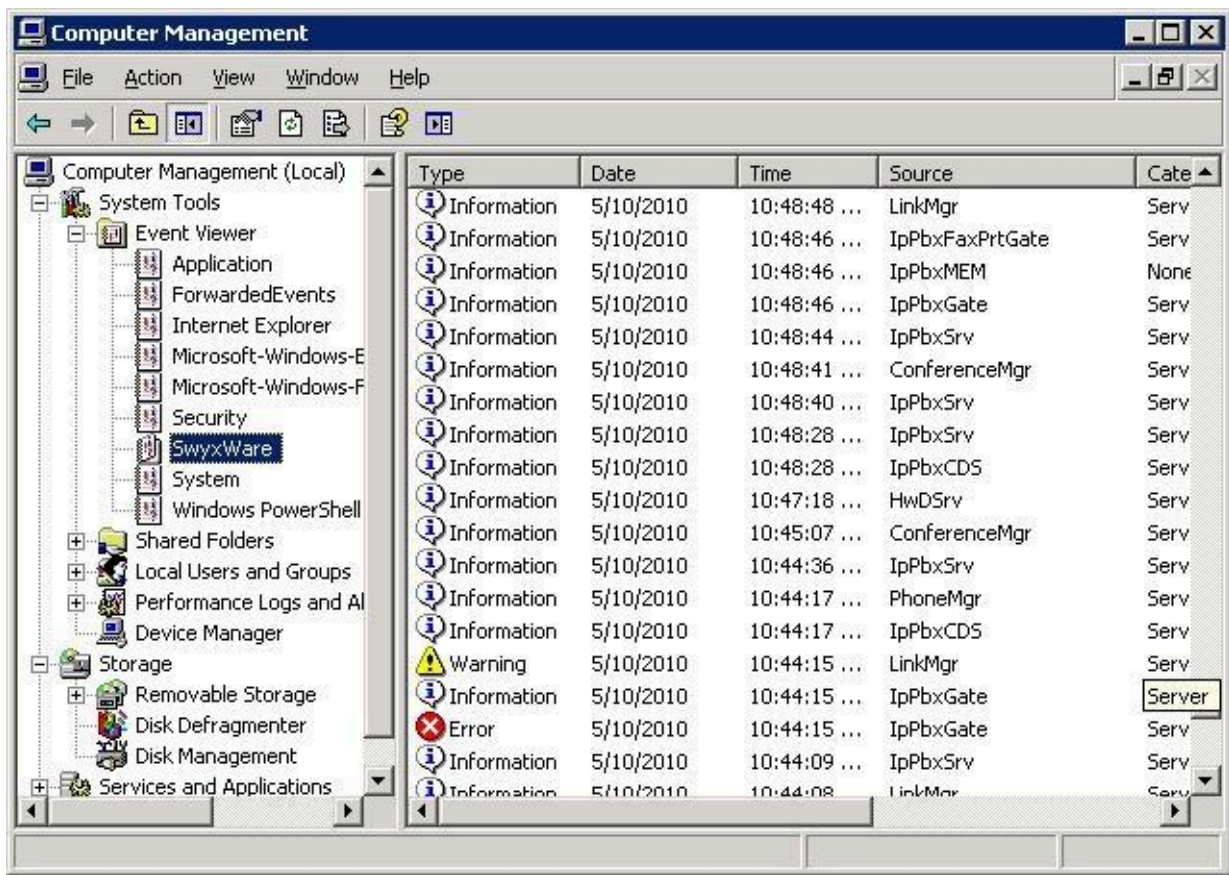

From 2009 to 2011 [mirjam baumberger](#) wrote a great blog, the "**Fridays' Swyx Tip**". Every Friday she posted a tip regarding the usage of SwyxWare and connected tools and devices. As the old forum is offline this article series will be restored here again over the time. Please note that some information in this article series might not be valid anymore with current SwyxWare versions.

This blog article was originally posted on 05.11.2010 03:42

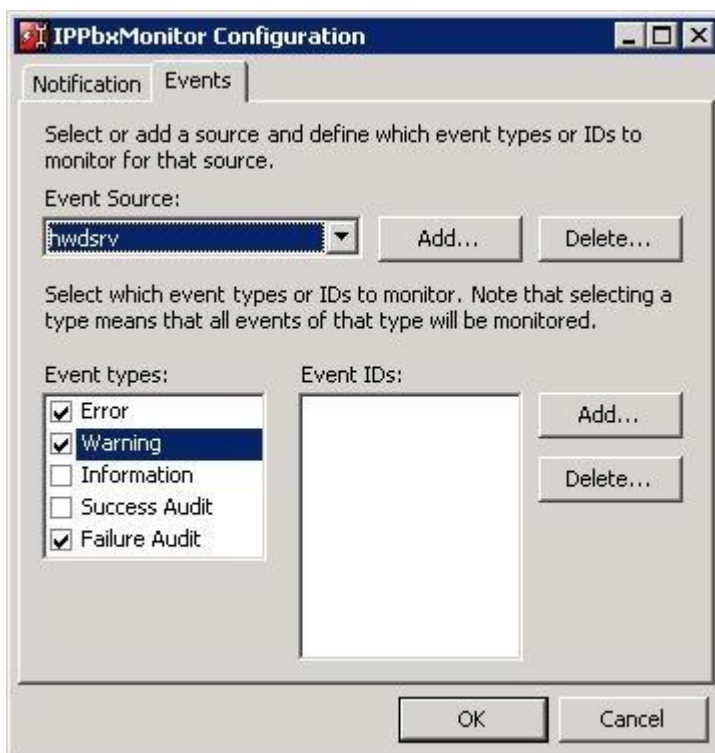

Dear Swyx Users

Did you know that with Swyx Event Log Monitor you can observe your Swyx IP-PBX and send out automated e-mails if an error occurs?

The Swyx Event Log Monitor is a Windows Service which monitors the Windows application event log of the Swyx system where it is installed and sends email notifications when new events are written into the log.

You can configure which events cause a notification by specifying the event source and per source a type (Error, Information, Warning, Failure Audit, Success Audit) or a list of event IDs. This monitoring tool can be found on the Sywx DVD in Tools.

Additionally this [Swyx Knowledgebase Article](#) contains an overview of all event log entries generated by SwyxWare.

Have a good weekend and happy Swyxing...

Regards

Mirjam
