This article is taken from the Swyx Forum Archive (2007-2014) and was originally posted 12.10.2008 by Morten Rokosz.

Swyxville is the most organized town in Techland, one quite nice place in Cyberspace. The town is controlled by a governing body called the **ECR** (Extended Cyber Republic). They are able to solve all problems using the **GSE** (Government Solving Engine). This machine is guarded by an elite of über-nerds using only the native language of VBScript. A language almost forgotten by all others in Techland.
